Topics:

➢ Deploy a simple web application on a server

➢ Add NRPE to monitor using the server

➢ perform URL monitoring, HTTPS status, content monitoring, hijack detection, etc

Hands-On:

➢ Deploy a simple web-based application on a server and monitor the same using Nagios

<u>Reviews</u>

Review 1:

I would like to highlight a few points about my association with Besant Technologies. The faculty members out here are super supportive. They make you understand a concept till they are convinced you have gotten a good grip over it. The second upside is definitely the amount of friendliness in their approach. I and my fellow mates always felt welcome whenever we had doubts. Thirdly, Besant offers extra support to students with a weaker understanding of the field of IT.

Review 2:

When I joined Besant Technologies, I didn't really expect a lot from it, to be extremely honest. But as time went by, I realised I got from Besant Technologies exactly what I wanted- a healthy environment for learning. Cordial teachers and their valuable lectures make understanding things so much easy. I thank Besant for having been so supportive throughout the course.
