

Azure Certification Path

Azure Fundamentals

Azure Fundamentals (AZ-900) is the first exam one should go for. This certification would help you in demonstrating your fundamental knowledge of Cloud services in Azure. Azure fundamentals exam is even suitable for those who are from a non-technical background and possess a minimal understanding of the cloud concepts.

Azure Administrator

The candidates who are appearing for this exam should be familiarised with the concepts like Azure Portal, ARM templates, PowerShell, Storage structures, Virtualization, Networking, and Cloud infrastructure. To go for the Azure DevOps Engineer Expert exam you must complete Azure administrator manager certification first.

Azure Developer

The Azure Developer Associate exam is designed to measure a candidate's ability in accomplishing these tasks such as develop Azure IaaS compute solution, develop a PaaS computation solution, implement Azure security, develop for Azure storage, troubleshoot, monitor, optimize solutions, and integration with third-party connections. It acts as a prerequisite for attending the Azure DevOps Engineer certification exam. After qualifying the AZ-203 exam you will receive a badge of Microsoft Certified Developer Associate.

Azure Solution Architect

Microsoft Azure Solutions Architect should possess the expertise in various concepts like compute, storage, network and security. All these skills together will help the candidate in designing the solutions that can be executed on Azure.

Based on the recent changes and introduction of role-based certifications from the Azure one should pass two exams namely Microsoft Azure Architect Design and Microsoft Azure Architect. Once you qualify these two certifications you will get a badge of Azure Solution Architect Expert.

Azure DevOps Engineer

Microsoft Azure Security Technologies AZ-500 exam measures your ability in accomplishing technical tasks such as implementing platform protection, manage identity and access, security operations, secure data, and applications. To take this exam you need not have passed any other certification.
